Experience

KPMG, Lagos
Intern Software Developer Nov 2024 – Apr 2025

- Developed, integrated and tested a real-time voice-calling system using Agora SDK, OneSignal, Flutter, .NET, and Firebase—successfully deployed across KPMG internal tools.
- Reduced response latency by 25% by implementing a custom queue management system with load balancing and intelligent routing logic.
- Conducted full analysis and technical documentation of 5+ live production codebases (.NET, Node.js, React), improving onboarding efficiency for the dev team.
- Validated service contracts and critical application flows by building comprehensive end-to-end test suites (manual and automated).
- Adapted rapidly to new technologies (Dart, Flutter), delivering production-ready features to a mobile app with 1,000+ active users within 3 weeks.
- Participated in client-facing meetings, live demos, and stakeholder updates—communicating technical progress and integration roadmaps.

IBM, Nottingham
Student Software Engineer Sep 2022 – May 2023

- Delivered a formal proposal presentation to IBM, securing collaboration ahead of 56 competing teams in the university-wide competition.
- Developed interactive educational tools using Unity and C#, simulating key AI and software concepts for student use.
- Leveraged IBM Cloud for backend storage and analytics, including IBM Watson for natural language insights on user interaction data.

Projects

Chess Autonomous Agent *Java*
`https://github.com/Konkz7/Chess-Engine`
Designed a lightweight chess AI using a custom evaluation function and optimized move-tree search for efficiency on limited hardware.

2D Platformer – "Possessed" *Unity, C#*
`https://github.com/Konkz7/Unity-Possessed-Platformer`
Explored what makes games fun by building and iterating on a polished 2D side-scroller. Focused on level design, momentum physics, and player engagement.

KPMG Whistleblower App *Flutter, Firebase, Agora, .NET*
`https://github.com/Konkz7/KPMG-Whistleblower-App`
Developed an anonymous reporting tool with real-time communication, VOIP call support, and secure authentication workflows.

BetSocial – Social Betting App *Spring Boot, React Native, PostgreSQL*
`https://github.com/Konkz7/BetSocial`
Built a decentralized social media platform allowing users to create and engage in peer-driven bets across social events.

Technical Skills

Languages: Java 21, Python, JavaScript/TypeScript, C, C++, C#, SQL, HTML, CSS
Frameworks: Spring Boot, .NET, JUnit, React, React Native, Flutter, Unity
Tools: Postman, Firebase,Git, Docker, REST, WebSockets
Practices: Agile, BDD, TDD, CI/CD, Automated Testing, MVC Architecture, OAuth2
Databases: PostgreSQL, Firebase Realtime/Firestore
Dev Environments: Android Studio, VS Code, IntelliJ IDEA

Education

University of Nottingham, London
BSc Computer Science with Artificial Intelligence (2:1) Sep 2021 – Jul 2024

Mill Hill County High School, London
A-Levels: Computer Science (A), Chemistry (A), Maths (A) Sep 2019 – Jul 2021

Interests

Brazilian Jiu-Jitsu: Represented university twice in national competitions, podium finisher.
Football: Lifelong enthusiast, both playing and watching.
Hiking and Scrambling: Completed routes across the UK including Tryfan, Snowdon, and Scafell Pike.
